Release Plan

Product Name: SlugApp

Team Name: Team SlugApp

Release Name: SlugApp

Release Date: 3/16/16

High-Level Goals:

- Be able to view a basic, centralized list of Santa Cruz's many events.

- Be able to view the UC Santa Cruz's dining hall menu foods for the current day and hour.

- Be able to view a map of the campus and view the location of loop buses in real time.

User Stories for Release:

Sprint 1:

1) As users, we want to be able to post events to the server. (16 story pts)

2) As developers, we want to serve relevant data to users. (3 story pts)

3) As developers, we want to be able to persistently store data. (5 story pts)

Sprint 2:

1) As users, we want to be able to browse upcoming dining hall meals in an intuitive way (13 story pts)a

2) As developers, we want to acquire dining hall meals data, store it, and display it to users. (11 story pts)

3) As developers, we want to ensure all of our bug tests pass. (6 story pts)

Sprint 3:

1) As users, we want to have an aesthetically pleasing and responsive browsing experience of all features. (15 story pts)

2) As developers, if we are ahead of schedule, we want to attempt to push out additional features like SlugBus integration. (8 story pts)

3) As developers, we want to ensure all of our bug tests pass. (8 story pts)

Backlog:

As users, we want to be able to be able to view a list of events with filters
